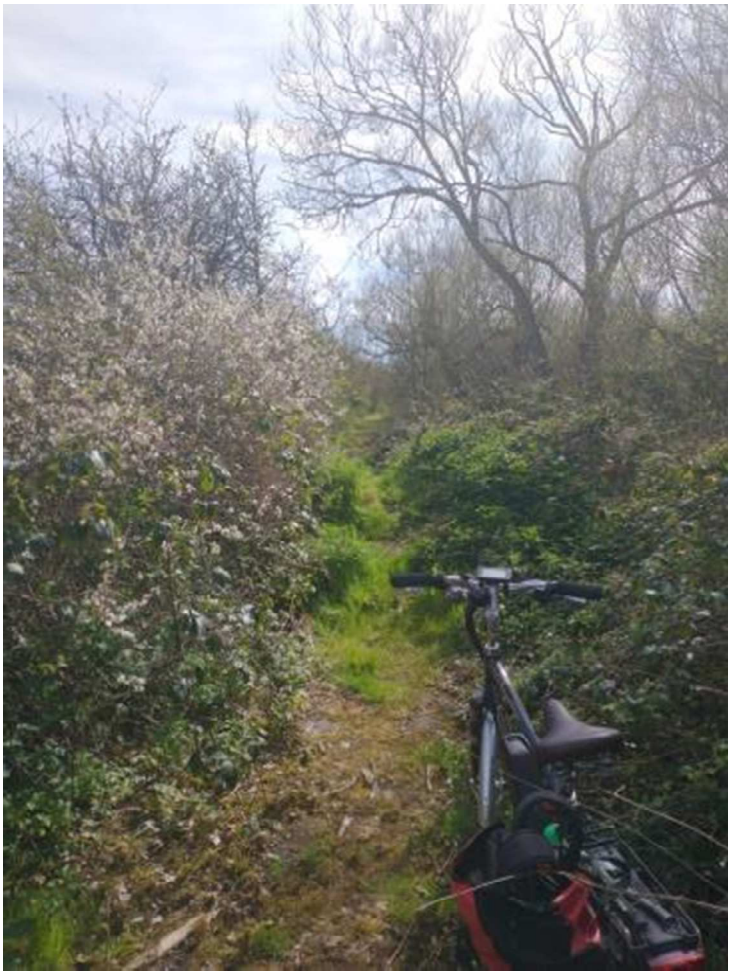
HOOE B/RWO 287 additional statement

On 15/4/22, whilst serving notices on site, I took the following photographs for the purposes of showing the character of the route.

Taken just west of Middle Bridge facing West

Looking East to Middle Bridge

Just west of point D- large mound which was nearly impossible to get a bike over and would be difficult for not so agile pedestrians.



Just east of point E

Just west of point G, where the route turns north. Impassible.
