Good morning Stephen

Thank you for taking the time to talk to me this morning.

I live at 11 Mill Way and am emailing on behalf of my neighbours, Margaret Putland of 9 Mill Way Polegate and Brian and Oonagh Petch of 10 Mill Way Polegate who have received your various letters, the last one dated 6th June regarding the adding and reclassifying footpaths as bridleways between Folkington Road, Wannock Road and Jevington Road.

We are concerned that the map enclosed with your letter cuts through their gardens, if not the actual properties of 9 and 10 Mill Way which we assume is an historic error or an issue with the accuracy of the marking up of the map. I have looked at the application made online with the various appendices.

I understand that your investigations have not reached the site visit stage but thought I should email to show you the existing footpath arrangement towards the end of Mill Way.

This photo shows how the current footpath s work. The natural line of people walking is up Mill Way to the gate we have installed (replacing a broken council one) at the top of the Close

The footpath adjacent to No 12 Mill Way which goes along our back garden is hardly used and only maintained occasionally. That change of direction was referred to in one of the appendices;

The 3 photos below show the current footpath, as you can see it is hardly used as walkers prefer to use the access at the end of Mill Way

From Mill Way

From the lane

The lane

The photos below show the access used by virtually all walkers from Mill Way to the lane and onwards toward Folkington

Interestingly the access to the footpaths from the lane to Folkington has recently been refurbished and a map showing the routes attached to the gate.

As I am sure you appreciate we are anxious to address this situation but feel certain that common sense will prevail.

I would be grateful if you could copy me into future correspondence regarding this matter either via email to [REDACTED] or by post to Paul Gietzen 11 Mill Way, Polegate, East Sussex BN26 5NH or phone [REDACTED]

With kind regards

Paul Gietzen
