Chloe

I have only recently noted the planning application relating to the 2016 application about the addition of bridleways in the race course area. I am still confused as to the route of the new bridleway as the existing one is named as BR18b but I consider that the current route is that of BR32.

Enlightenment please! I thought that you wished the new bridleway to have a route nearer the old race course railings ie that of 18b and that BR32 was the incorrect James Oliver invented current route.

On the map 18b is not the current route but this appears to be that stated in the order for future use.

John
